PARMEET KAUR

Full-Stack Web Developer | AI Integration

Delhi, India | parmeetkaur25@navgurukul.org | +91 6399709329 | GitHub| LinkedIn

PROFESSIONAL SUMMARY

BCA student building full-stack JavaScript applications with React, Node.js, Express, and REST APIs. Shipped projects including a Kanban-style project tracker, an e-commerce admin portal with protected routing and Context API state management, and an AI-integrated chatbot with a secure Express backend. Comfortable across the stack, from React Query data fetching and React Router data APIs on the frontend to Express route handlers and third-party API integration on the backend. Experienced in mentoring peers through coursework.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), React, TanStack React Query, Vite
- **Backend:** Node.js, Express.js, MongoDB , Mongoose
- **Tools and Practices:** Github ,Vercel, Axios, Canva, figma
- **AI and Integrations:** Google Gemini API (@google/genai)

PROJECTS

Gemini AI Chatbot | September 2026 Live Demo | GitHub

Tech Stack: Node.js, Express.js, Google Gemini API, dotenv

- Built a full-stack AI Q&A web app using Express to handle POST requests to a /ask endpoint, forwarding queries to Google's Gemini API (gemini-2.5-flash) and returning generated responses.
- Secured the Gemini API key server-side with environment variables so it was never exposed to the client.
- Implemented JSON request/response handling, async/await API calls, and error handling for failed AI requests.
- Deployed the application, serving the static frontend directly through Express.

Nexus E-commerce Admin Portal | July 2026 Live Demo | GitHub

Tech Stack: React, React Router, Context API, Axios, Vite

- Developed a React-based e-commerce platform combining a public storefront with a protected admin dashboard.
- Implemented authentication-gated routing using a custom AuthContext and a ProtectedRoute component to restrict admin-only pages.
- Built a CRUD product management dashboard (create, edit, delete) with table and form views for admin users.
- Designed a shopping cart with Context API state, debounced product search, and skeleton loading states.

DOM Interactive Website | October 2026 GitHub | Live demo
Tech Stack: HTML, CSS, JavaScript, DOM

- Developed an interactive frontend website using **HTML, CSS, and JavaScript** with dynamic DOM manipulation.
- Implemented JavaScript-based **event handling and user interactions** to make the webpage responsive and interactive.
- Used **DOM traversal and element manipulation** to dynamically update webpage content and UI elements.
- Structured the project with separate HTML and JavaScript files for maintainable and organized frontend development.

EDUCATION

Bachelor of Computer Applications (BCA) | Present

Eternal University
